WORK EXPERIENCE

Freelance Web Developer, Feb 2017 - Present

- Front end UI design styling and programming UX features for websites and applications
- Create APIs or provide API integration using REST design architecture
- Handle backend debugging and feature requests in Python and Ruby web applications

Skills: HTML, CSS, JavaScript, jQuery, Bootstrap, Python with Flask & Django, Ruby on Rails, Capistrano with Rails, AngularJS, ExpressJS, NodeJS, MySQL, and MongoDB

Coding Dojo, **Resident Full Stack Developer**, Sept 2016 - Present Burbank, CA

- Learned, developed and deployed web applications across three technology and language stacks
- Successfully fulfilled Coding Dojo bootcamp program Teaching Assistant prerequisites, and received strong support and reviews from program instructors after interview completion.
- Worked with team members to solve JavaScript algorithms; manipulating basic data types and data structures such as linked lists and binary trees.
- Participated in a community open source project meetings (Dojo After Dark)

WCH Group Inc., **Product Development Assistant/ EDI Coordinator**, June 2014 - August 2016 Los Angeles, CA

- Managed all EDI document transaction processing, troubleshooting. Additionally, training new employees and temps on system usage and processing procedures.
- Increased efficiency of order processing work flow by 30%
- Creating documentation system for each individual trading partner's compliance standards and vendor requirements
- Coordinated and managed internal projects to update and optimize the company's ERP system and database, corresponding daily with 3rd party tech consultants
- Created and integrated custom reports using SAP Crystal Reporting software

The Dependable Companies, **Client Services & Order Fulfillment Rep**, October 2012 - June 2014 Los Angeles, CA

- Managed assigned client account's retail inventory for each order and shipment within Cadence WMS system software
- Reduced cost, fulfillment and shipment ETA for 100+ store orders by calculating delivery dates and shipment cost per store, achieving a complete and optimized re-write of existing warehouse work orders.

Lucas Design Intl., **Sales and Product Development Assistant**, October 2012 - June 2014 Los Angeles, CA

- Fostered positive long-term relationships with buyers and sales rep's, providing daily correspondence and support
- Assisted head of production on various aspects and stages of jewelry and textile goods manufacturing, testing, and packaging with overseas factories
- Worked with designers on packaging improvements and revisions, creating Photoshop packaging design specs.

VOLUNTEERING & OTHER ACTIVITIES

- Contribute to Team Treehouse community forums, answering web programming and design questions
- Assisted other bootcamp students in troubleshooting, researching and debugging code issues, as well as provided tutoring and review of major programming concepts upon request.
- Staff writer for the Valley Star newspaper regularly contributing 1-2 articles that were taken to print per week.
- Created page layouts using inDesign and CS4 in addition to writing duties
- Assisted copy editor in proof reading to meet urgent print deadlines
